PROF. (DR.) NITIN M. NAGARKAR

MS (PGI), DNB, MNAMS, FIMSA

DIRECTOR

Professor, Otolaryngology-Head & Neck Surgery

I am glad to know that the Department of Orthopaedics is organising a National Symposium on Fragility Fractures of the Lower Limb on 24th August 2014.

Mobility among the elderly can be significantly affected when fractures are sustained. The ageing population is on the rise and most elderly today desire to lead healthy and active life styles. It is important for every individual to be independent and self sufficient particularly in carrying out activities of daily living. Loss of mobility due to fracture of lower limb is of greater concern as the patient will not be able to sit up or even walk resulting in complications of immobility like bed sores, urinary tract infections and depression to name a few.

Therefore, there is a need to understand not only the methods of fixing a fragile bone but also the pre-operative care, surgery, rehabilitation and secondary prevention of fractures in a holistic manner. A national symposium of this kind will help in providing knowledge about essential multidisciplinary ventures in dealing with fragility fractures of lower limb.

It is heartening to learn that very senior guest faculty will be participating in this symposium.

I am sure all the delegates will go back enriched with latest knowledge and information. I wish the CME all success.
