

Drug Information Center

- In medical profession, healthcare professionals must be updated with drugs and their indications, contraindications, adverse effects and their use in special population.
- The treating physician shall also be updated with newer prescription writing norms, newly marketed drugs and drugs banned in India etc.
- Pharmacovigilance is another area which needs collaborative approach by stakeholders like Pharmacologists, Healthcare Professionals, students and Consumers.
- Department of Pharmacology, AIIMS Raipur has taken this initiative to launch “Drug Information Center” to cater above needs.
- We are hopeful that not only healthcare professionals but also students and patients will also be benefited by this venture.
